

DOE

Yucca Mt. RECD

President Bush,

AUG 22 2001

July 18, 2001

From a very Concerned Citizen of Nevada with a lot of other Concerned Citizens. We do not appreciate you putting this yucca mountain toxic waste dump in our city. I do not think it is fair to contaminate our city. I know they say it will properly be sealed but I don't agree with that at all. We had the same problem in Niagara Falls N.Y. with the love canal and that was properly sealed too. I think you know what I am saying. The drums leaked and got into our soil & our water and in our air. Our rooms were contaminated and our fish were floating upon land. We had contamination coming up in our sump pumps in our basements with sludge & people were breathing that in. One earthquake here and those drums in Yucca mt. with seep toxic waste & toxic waste travels for miles & it will reach here. This is the green capitol of the world why would you want to destroy it? Put these toxic waste sites in your back yard where your children & Grandchildren play. I am trying to say we have children too. The trucks will be traveling through our City past our schools. What if the truck has a leak or break but our children & citizens will be affected. Think about it & reconsider it. Niagara falls had a population of 138,000 people now its down to 45,000. Isnt that tell you something? why destroy las vegas? that's not

right. I am not the only one that feels the way,
A lot of people here are against it. It is not to
late. I am a citizen of the United States and
I have a right to express my opinion + the
people of Las Vegas. Please reconsider
it means lives. I am sure you will do
the right thing.

Very Truly Yours
Terry Cristofle
